

KUSTOM KIT®

CLOTHING FOR PERSONALISATION | 2026

KUSTOM KIT®

WELCOME TO OUR 2026 COLLECTION

Kustom Kit continues to redefine what premium personalised uniform can be. Offering contemporary uniform solutions for the modern workplace with quality and innovation at their core.

Our polo and shirting collections have always been the cornerstone of our brand but over the last few years we've been focusing on creating a wider range of layering options. It's here where you'll find several new styles for 2026, each presenting a fresh option for pairing with some of our timeless classics.

Buy Less, Buy Better is not just a slogan, it is the ethos behind every design decision we make, from developing fabrics that perform for longer to optimising stitch length for strength and durability. Because of this commitment to quality, you can be sure that your logo will look better and last longer on a Kustom Kit garment!

THE MOST SUSTAINABLE GARMENT IS THE ONE YOU ALREADY OWN

ADDRESSING ENVIRONMENTAL CONCERNS IS RIGHT AT THE TOP OF OUR PRIORITIES LIST

We know we're not perfect, so by evaluating and improving our business operations, we are continuing to reduce our environmental impact in our quest to grow sustainably.

This is our approach to a better and sustainable future. We're also committed to eradicating modern slavery and forced labour.

For over 30 years our brand has been known for designing and manufacturing clothing that lasts. We believe that high quality, ethically sourced garments are crucial to reducing our environmental impact. Helping to slow down material flow, reducing overconsumption, and encouraging repair over replace.

WE MAKE QUALITY GARMENTS THAT LAST

Our designers take care to consider each detail of a garment's construction, optimising stitches per cm, and strengthening the areas that get the most wear. We strive for functionality and durability but never at the expense of style and comfort.

You can read all about our approach to a better and sustainable future at: kustomkit.com/ourapproachtobetter

Great workwear should provide exceptional performance in all working environments and our renowned Superwash® 60° collection doesn't disappoint.

Kustom Kit hallmarks such as ethical sourcing, superior quality construction and enhanced wearer comfort all come as standard, but our Superwash® 60° styles can also be washed up to 60°C for easier removal of stubborn stains without affecting shape or colour.

WHAT ARE THE BENEFITS?

FABRIC

Our Superwash® 60° fabrics are made from high quality yarns, knitted to a tight tension which means that the garments are super hard wearing. We use long fibred yarns that produce a compact fabric surface that is highly resistant to piling. Our dyes are designed to keep their colour even when washed at high temperatures while still being kind to the skin and the environment.

GARMENT MAKE-UP

The make-up is always of high quality. Features such as double stitched seams ensure durability whilst back neck and shoulder tape provide wearer comfort and shape retention. We also don't scrimp on stitches which ensures optimum seam strength.

Please note: Superwash 60°C wash can only be guaranteed on non-decorated garments.

PRINTABILITY

We have engineered all our Superwash® 60° fabrics to be the perfect base for decoration. The clean compact surface provides the perfect canvas for ink and vinyl. Its compact construction also allows for even the most stitch heavy embroidery designs.

ETHICALLY MANUFACTURED

Kustom Kit believes in respecting people and the environment. We ensure that our suppliers are totally committed to exceeding our high ethical standards. Our Superwash® 60° garments are very highly accredited, holding OEKO-TEX Standard 100 certificate, their own OEKO-TEX MADE IN GREEN labels, and are produced in a factory that holds a WRAP Gold certification and are members of Sedek and Amfori BSCI.

* KK460 holds an OEKO-TEX Standard 100 certificate and is produced in a factory that is a member of Sedex.

SUPERWASH 60° IS A FEATURE OF 19 STYLES WITHIN OUR 2026 COLLECTION.

THE KLASSIC POLO

The original Kustom Kit polo. Offering the widest choice of colours and sizes, our Klassic Polo is renowned for its superior quality and Superwash® 60° performance.

KK423 RECYCLED POLO

Looking for a recycled polo that performs?

Kustom Kit has developed an innovative recycling process that ensures the yarn is identical to virgin fibre. This results in a garment that lasts longer and performs better than standard recycled knitted garments. Better for you and better for the planet. The KK423 is part of the Superwash 60° family meaning it can be washed at 60°, making it ideal for even the most challenging working environments.

KK304 SUPERWASH® 60 HOODIE

A smarter, safer hoodie developed in direct response to customer demand.

Most hoodies on the market feature drawcord neck ties but in many industrial, logistics, and construction settings, these ties are prohibited due to health and safety regulations.

Our unique KK304 has no neck ties meaning no safety compromise. It's engineered for hard-working environments, fully washable at 60°C and safe to tumble dry without affecting colour retention, shape, or fabric integrity.

LAYER UP IN STYLE

Gone are the days of one-size-fits-all. Kustom Kit are helping businesses rethink how uniforms are worn with more options to combine garments and wear them in ways that feel modern, smart, and personal.

When buyers see how pieces from different collections work together, it sparks imagination. Layering styles from our corporate and casual wear ranges, enables you to create versatile new looks for your whole team.

AN EFFORTLESS COMBINATION OF
casual and corporate

KK504 FASHION FIT TEE

Men's Superwash® 60° t-shirt crafted from a combination of polyester and ring spun cotton to provide maximum comfort and longevity.

KK184 WORKWEAR OXFORD SHIRT

A slim fit version of our KK351 Workwear Oxford Shirt. A comfortable yet hardwearing option that is suitable for a range of corporate environments.

KK302 KLASSIC SWEATSHIRT

Crew neck sweatshirt with reinforced strength due to twin needle seaming. Highly durable thanks to the Superwash 60° fabric.

KK933 SWEAT PANT

These on-trend slim fitting sweat pants are fashion-styled, featuring cuffed ankles and waist tie.

KK254 ARUNDEL 1/4 ZIP SWEATER

Our new 1/4 zip knitted sweater is cut in a flattering, regular fit to suit all body types. It's designed to meet modern workplace needs but is stylish and versatile enough to wear when you're off-duty too!

To ensure the KK254 really delivers on wear and durability, we've used enzyme-wash technology which results in a cleaner, stronger, and softer surface, offering both enhanced performance and improved visual quality – all done without chemicals.

GARMENT CARE

Ever wondered what the little symbols on care labels mean? Here's a helpful guide on all you need to know about taking care of your Kustom Kit garments which can lead to a longer life for your clothes. So how can you make your clothes last longer without being ruined in the laundry? We've created a guide to help you identify the care symbols and understand what they mean including some conscious tips on how you can preserve the look of your garment for even longer whilst reducing the impact on the environment.

WASHING SYMBOL

The washing symbol is generally illustrated as a tub filled with water. If the garment is machine washable, it simply tells you the recommended washing temperature and the correct washing cycle. When you see one line drawn underneath the tub, it means that your garment should be washed on a synthetic cycle which offers a medium agitation wash along with a low-speed spin cycle that's best for your synthetic fibres. It's essential to wash at the correct temperature as this will protect the fabric

and keep your clothes looking newer for longer along with the following tips:

- Close all zips, undo buttons, and flatten out collars and cuffs.
- Check pockets and linings or loose or sharp objects.
- Don't overload the washing machine.
- Turn your garments inside out to avoid abrasion from other garments.
- Check garments regularly for marks or stains and remove as soon as possible (see stain removal section for some helpful advice).

Conscious tip: Even though the labels illustrate the safe washing temperature for your garment, you can wash at a lower temperature to put less stress on the material of your garment as well as helping the environment. Most modern detergents perform just as well on a lower temperature.

BLEACH SYMBOL

Before attempting to improve your whites, please consult the care label because some garments might not be able to handle bleach agents. The bleach symbol is illustrated by a triangle. If you see an empty triangle then bleach is allowed, when necessary. Diagonal lines refer to the use of non-chlorine bleach and the

crossed out triangle indicates that you shouldn't use bleach at all.

Conscious tip: Chlorine based bleach is great at removing stains, but it's also heavy on the environment. There are friendlier alternatives that can be used to whiten and brighten clothes. Natural

solutions such as baking soda, white vinegar, or even lemons can help remove stains. Always test a removal method on a hidden patch of your garment.

DRYING SYMBOL

The above symbols will help you establish the correct drying method. Essentially, the more dots the higher the permitted temperature. The crossed out drying symbol simply means avoid tumble drying and their damaging effects on certain materials. When tumble drying is not advised see the following recommendations:

- When line drying shirts or jackets, always hang from the tail.

- Reshape whilst damp, by gathering the hem in one hand, holding the shoulders in the other and pulling back into shape.
- When line drying knitted garments, always fold over the line and position pegs at the underarm.
- When line drying trousers or skirts, always hang from the waist.
- Do not leave clothes exposed to the sun after they have dried.
- Avoid drying garments on radiators or

in intense heat as this could distort the shape.

- Drying garments by hanging on coat hangers minimises creasing and speeds up the drying time.

Conscious tip: Tumble dryers require a lot of energy, cause stress on the fibres and can distort the shape of your garment. Air drying is much more sustainable and will prolong your wardrobe.

IRON SYMBOL

Irreparable damage can easily happen if the recommended heat setting is not adhered to, especially for delicate fabrics. The ironing symbol is illustrated as an iron with dots which indicates the temperature setting. Again the more dots the higher the temperature.

- Do not iron directly onto a printed garment, always iron on the reverse.
- When ironing dark garments avoid 'iron shine' by either pressing on the inside of the fabric or through a damp cloth.

Conscious tip: As ironing can cause stress to your garments, a good alternative is to simply hang your clothes in the bathroom while you're having a hot shower as the steam should smooth out the wrinkles. Hanging your garments to air dry will also minimise and reduce creases and wrinkles.

DRY CLEAN SYMBOLS

A circle indicates if your garment is suitable for dry cleaning, while the letters instruct on the required solvent to use.

Conscious tip: Dry cleaning is a highly chemical intense process. A simple alternative is to hand wash delicate fabrics using mild soap and lukewarm water.

COMMON WASH PROBLEMS

Shrinkage:

The major contributing factors to shrinkage are heat and excessive agitation. Therefore, do not wash at too high temperatures. Always wash on the most appropriate cycle and follow the care instructions.

Pilling & Bobbling:

Abrasion and lack of regular washing cause fibre balls to appear on the surface of the fabric. Remove carefully by brushing or picking off.

Fading in the Sunlight:

Sunlight can be very harmful to fabrics and the effects are irreversible. Reduce exposure to direct sunlight wherever possible.

Colour Staining:

Always wash similar colours together. Never leave damp garments together for any length of time

STAIN REMOVAL

Most stains can be rectified by fast action, basic household items and these helpful tips.

White Wine: Rinse the stain in warm water then soak in a warm detergent solution.

Red Wine: First soak the stained area immediately in white wine or soda water to remove the colour, then launder as per the care label.

Beer & Spirits: Firstly, rinse or soak the stain in lukewarm water and then launder in heavy duty detergent as per the care label.

Coffee & Tea: Soak up liquid with an absorbent cloth and sponge with warm water. Rinse with cold water and wash as per the care label.

Food: Soak the stain in cold water and salt or in warm soapy water and then wash immediately as per the care label.

Fat, Grease & Oils: Remove as much of the deposit as possible and work in neat washing up liquid with fingers. Treat with warm water and then wash immediately as per the care label.

Ball Point Pen: Apply methylated spirit or glycerine sparingly and mop up any loose colour. Rub any remaining stain with detergent and wash as per the care label.

Make-up: Do not rub the stain. Pat with talcum powder to soak up any grease and then work in neat washing up liquid with fingers before washing.

Extra tips and advice

- Most stains can be removed by soaking in cold water, but as with all stains, prompt attention is important.
- Do not use hot water to rinse the stain as this may cause it to set.
- Place the stain over an absorbent cloth or wad of kitchen paper. To avoid the dreaded ring, first target the area around the stain and then work towards the centre.
- Always test the removal method on a hidden part of the garment first to ensure that it does not harm the fabric.

PRODUCT SPECIFICATION SHEETS

Due to the variety of different fits across the Kustom Kit range, we encourage our customers to examine individual product specification sheets in order to establish precise measurements for each garment.

These sheets are available to download from the respective product pages at www.kustomkit.com and provide a comprehensive overview of measurements including actual chest, length and sleeve length along with a product description, ethical accreditation and care instructions.

HOW WE MEASURE UP

PROVIDING UNIFORMITY WHILST CATERING FOR THE INDIVIDUAL

We understand that everybody is different, which is why we provide such a diverse range of fits and sizes across our collections to ensure that the whole team look and feel great. Here's our guide explaining the various fits we offer to help you select your perfect Kustom Kit garment.

GENERAL FIT INFORMATION

Our non-shirting styles comprise of the following cross-section of fits as denoted on the individual product pages...

CLASSIC FIT

A traditional forgiving silhouette allowing ease of movement.

REGULAR FIT

True to size. A neater more contemporary fit without being restrictive.

SLIM FIT

Close fitting throughout the body and sleeve.

FASHION FIT

Body skimming fashion led styling.

SHIRT FIT INFORMATION

Our corporate shirt collection is one of the most diverse in the market. We've created a range that empowers teams to feel smart in any business environment whilst catering for individual preferences. In order to achieve this we've continually developed our choice of fits to provide enhanced wearer satisfaction. The following guide will help you understand the design of each fit in order to help you find your ideal shirt.

WHAT'S MY SIZE?

To decide on the best fit for you, it's important to know your measurements. Firstly measure your chest around the fullest part and refer to our measuring guide. Next measure your collar, around the base of your neck whilst keeping your index finger between the tape and your neck, again refer to the measuring guide. The measuring guide is in actual body measurements not garment measurements, so if your chest measures 43"/109cms and your collar measures 17"/43cms we recommend that you take a 17" collar Kustom Kit shirt.

WHAT IF I'M IN-BETWEEN SIZES?

This will depend on how you like to wear your shirts. Classic shirts are cut more generously so will be more forgiving if you size down. Slim fit shirts however are neatly cut so we would recommend sizing up if you are between sizes.

WHAT'S MY FIT?

We offer three different shirt fits

CLASSIC FIT

A traditional silhouette featuring straight side seams and a more generous fit across the chest, waist and sleeves. Cut with a long shirt tail that stays tucked in and wide armholes for ease of movement. Our classic shirts will have either side pleats or a central pleat to the back yoke for a non restrictive and comfortable fit. As a guide based on a 17" collar shirt the actual chest measurement will be 16cms larger than your actual chest and 32cms larger than your actual waist. Sounds a lot? Not really when you consider these measurements in a three dimensional context.

TAILORED FIT

Our tailored fit shirts are just that! Tailored throughout the body and sleeve for a closer fit that is both smart and contemporary. We taper the waist to ensure a clean silhouette while retaining an unrestricting garment shape. As a guide based on a 17" collar shirt the garment chest measurement will be 12cms larger than your actual chest and 22cms larger than your actual waist.

SLIM FIT

Our closest fitting shirt is tailored through the body and sleeve. For a sleek appearance we taper the waist and add darts to the back. We keep the cut narrow at the shoulder and lift the armhole to enhance the modern slim silhouette. The result is a surprisingly flattering wearable garment that suits all. As a guide based on a 17" collar shirt the garment chest measurement will be 12cms larger than your actual chest and 14cms larger than your actual waist.

Stretch Fit: Our slim-stretch shirts combine an ultra-sleek fit with a touch of elasticity to enable full range of movement whilst retaining the unmistakable feel of a Kustom Kit shirt.

WHAT IS OEKO-TEX®? AND WHY IT MATTERS

OEKO-TEX® is a globally recognized certification system that certifies textiles are free from harmful substances, helping ensure compliance with international requirements and regulations. It promotes sustainable and responsibly made textiles through its various certification standards.

In a world where sustainability and safety define brand credibility, OEKO-TEX® has become a trusted benchmark in textile certification. And when it comes to corporate promotional and uniform apparel, few names align more closely with these standards than Kustom Kit.

OEKO-TEX® STANDARD 100

The most well-known certification. All garments in the Kustom Kit range are OEKO-TEX® STANDARD 100 certified, ensuring that every component of the finished product has passed safety tests for the presence of harmful substances.

- Guarantees safety from harmful substances to human health.
- Faster market access with reassurance of chemical compliance.
- Increased consumer confidence.
- Enhances brand trust.

OEKO-TEX® STeP

This is a facility-specific audit, meaning the production site has been independently audited and certified according to strict OEKO-TEX® STeP criteria for environmental sustainability, chemical management in textiles manufacturing and responsible factory management practices.

- Improved environmental performance.
- Enhanced worker protection and social responsibility.
- Better chemical management.
- Supports sustainability goals.
- Supports Made In Green labelling.

OEKO-TEX® MADE IN GREEN

OEKO-TEX® MADE IN GREEN labelled products have been extensively tested according to OEKO-TEX® STANDARD 100 safety criteria for consumer health and produced in an OEKO-TEX® STeP certified and audited production facility.

- Combines safety and sustainability.
- Provides transparency and traceability.
- Strong consumer confidence at the point of sale.
- Supports continuous environmental and social improvements.
- Enhances brand trust.

Our Commitment to Sustainable Production

40% of our range now holds its own OEKO-TEX® MADE IN GREEN label, meaning these products are traceable throughout their production lifespan. Always check for the OEKO-TEX® MADE IN GREEN label on our product pages as this guarantees they meet strict safety, environmental and social standards.

MULTIPLE ACCREDITATIONS FOR BROADER ASSURANCE

Kustom Kit doesn't stop with OEKO-TEX®, our ethical sourcing framework includes:

- WRAP, SMETA (Sedex Members Ethical Audits) and BSCI audits
- RSC Factory safety programs

Together, these provide a high level of confidence in both product integrity and supply chain ethics.
